

Designer Fake Hand Bag- A Multimillions Business

As published in New York Times dated June 4, 2004, nearly about 17 men were caught up by police smuggling the counterfeiting handbags by renowned designers and cover a huge shipping container fully loaded with forged handbags manufactured in local factories of china.

These handbags were smuggled to top stores of china town in New York City through different ports where custom officers accept \$ 50,000.for each consignment. The smuggled items are recovered from outside of a store at Canal Street where police also found a hidden storeroom filled with forged handbags. The store has a secret opening to that storeroom operated with a remote control.

However it is hard to distinguish between genuine designer bag and a forged hand bag because they have resembled closely. But if you inspect the fake handbag, you will surely be able to see the difference as forged handbags are made of cheap leather and stitched unevenly. Another difference between real and fake handbag is the price of bag. A top quality designer hand bag is avail able in market at \$500 to \$1000 whereas forged handbags can be easily purchased on \$100 to \$200.

And if you buy a bag from a roadside automobile store then no doubt that it is not genuine. Many people may be of the opinion that what is harmful if one buys a fake hand bag. There are many reasons to support the statement that forged products should be avoided. Fist of all we are taxpaying customers, in case of fake products we have to bear tax for this illegal tax free business.

As stated by the government sources that near about 200 billion counterfeit firms are running their business without paying tax. This shows that tax paying firms are defiantly producing a different product. Second reason to avoid forged product is that by purchasing a fake item say counterfeit handbag, we are promoting criminal activities.

Available fact shows that terrorist is financially supported by illegal business. Research studies have also indicated that these counterfeit handbags are prepared by the children on insufficient compensations.

Now question arises that how smugglers succeed in breaking the low. The most of forged handbags are manufactured in third word countries the sent to different international markets. When these handbags are smuggled, they contain no label because without legal no one can claim for fraudulency.

These bags are labeled in the country where they have to be soled. However, no being proved to be involved in illegal trade, a smuggler has to pay for \$250,000 fine and five year in jail. The profit in this business ranges in millions per year. It is legal duty of every one to help the government to stop the trading of counterfeiting products.

If you know about any of the firm dealing with such kind of handbags, you can submit the complain against these forged bags on the official sites of handbag designers like coach, Louis vuitton, Kate spade, christen Dior, Gucci, prada etc.
